*In Animal Life in Nature, Myth and Dreams, Elizabeth Caspari connects the world of real, living animals with the symbolic world of animal images in human thought, both conscious and unconscious. She gives the reader an opportunity to make this connection on his or her own personal journey of discovery. This book is a study of animals-their natural history, mythology, folklore, and religious significance around the world as well as their role in our lives, dreams, and everyday language. It examines the symbolic impact animals have on our collective culture, particularly on our own personal and interior lives. From Albatross to Zebra, each animal is pictured in color and factual context is given about its behavior in the natural world. Information is included about habitat, distribution, weight, size, longevity, and classification. By drawing on a process of amplification developed by C.G. Jung, in which an image is related to a previous historical, mythological, religious, or ethnological context, Animal Life in Nature, Myth and Dreams discusses the meaning of the animal in a dream, amplifying the reader's understanding of that animal. Intended for anyone interested in the actual behavior and nature of animals and the world we live in, Animal Life presents a good deal of ethological and mythological material. By contemplating the significance of our fellow creatures, and how everything in our universe is connected, Animal Life offers a more whole, and more healing, view of the world. Fully illustrated in color.*
