This book, the proceedings of Falk Symposium 90 held in Hong Kong, February 29-March 1, 1996, presents the most recent advances in all major fields of hepatology. World experts discuss basic and clinical aspects of viral hepatitis, toxic, metabolic and cholestatic liver diseases, liver cirrhosis, hepatocellular carcinoma, gallstone disease and liver transplantation. In the two sections devoted to viral hepatitis, special attention is given to hepatitis C. Besides interferon, new antiviral therapies are discussed. In the section on toxic and metabolic liver diseases, besides drug-induced liver injuries and inborn errors of metabolism, alcoholic liver disease is of special interest. New interventional treatments for portal hypertension and ascites are discussed in the section on cirrhosis. In the section on hepatocellular carcinoma different therapeutic strategies are compared. An update on pathogenesis and treatment of gallstone disease is also included. The book concludes with a section addressing the newest trends in liver transplantation. Thus, this book presents the most complete update on hepatobiliary diseases in Asia in 1996.
