*"Drawing on extensive research, Daniel Pinchbeck presents a compelling argument for the need for change on a global basis. The central thesis is that humanity has unconsciously self-willed ecological catastrophe to bring about a transcendence of our current condition. We are facing an initiatory ordeal on a planetary scale. We can understand that this initiation is necessary for us to evolve from one state of being - our current level of consciousness - to the next. Overcoming outmoded ideologies, we will realize ourselves as one unified being, a planetary super-organism in a symbiotic relationship with the Earth's ecology and the entire web of life"--Publisher description.*
