"By bringing together new reflections on canonical, and some non-canonical, writings from the earliest period of English literature to c.1500, Readings in Medieval Texts offers a unique insight into medieval literary production that provides students with essential tools for close reading and textual analysis. An introductory chapter highlights overarching trends in the composition of English literature in the Anglo-Saxon and later medieval periods, and provides an overview of the textual continuities and innovations. Individual chapters themselves give detailed information about context, authorship, date, and critical views on texts, before providing fascinating and thought-provoking examinations of crucial excerpts and themes." "This book will be invaluable for undergraduate and graduate students on all courses in Medieval Studies, particularly those focusing on understanding literature and its role in society."--BOOK JACKET.
