The notion that those of us who are Christians are some kind of flat?earthers, who are impervious to reason and evidence-based science, is utterly false. For atheism to succeed as an ideology, humanists must find an alternative explanation to creation and intelligent design. Therefore, there is a hard push for molecule-to-man evolution to be accepted as dogma. In this book, a robust riposte is presented to the current most popular book pushing this concept on the unsuspecting public (The Greatest Show on Earth by Richard Dawkins). A lot of research has gone into Evolution: What Dawkins Did Not Tell you, and the thinking of several other leading scientists is encapsulated. What is clear to the author at the end of his exhaustive research, is that macroevolution, just like green men on Mars, is desperate wishful thinking. It is hoped this book will be read by the lay public, scientists, college and high school students, evolutionists, creationists, as well as policy makers in education and political leaders. If read with an open mind, there can be only one conclusion: In the beginning God created the heavens and the earth.
