*In the early years of cosmological redshift discovery choice had to be made between the phenomena of velocity-shifts & those of photon energy loss, as the cause of these redshifts. In his book "The Observational Approach to Cosmology" (Oxford University Press, 1937) Edwin Hubble gives a very lucid description of reasons for velocity-shifts being accepted as true sources of redshift. Photon energy loss was, at that time believed to be "some unknown reaction between the light & the medium through which it travels" quoting from page 45 of Hubble's book. REDSHIFT CONNECTION provides a rigorous, quantitative analysis of gravitational interaction of mass with electromagnetic radiation, where gravitational field of a photon is not regarded as being negligibly small & its inclusion in the calculations shows that gravity rather than spacetime expansion is the true cause of cosmological redshift. Other, related, paradigms are examined in the light of this finding, such as: gravitational vs. inertial mass, production of long range force, nature of dark matter & the source of cosmic background radiation. The ideas presented in REDSHIFT CONNECTION put in question many presently held theories, not only in the study of Astronomy & Cosmology, but in all of Physics. Order from: Arysutt AMS, P.O.
